June 27, 2022

I am pleased to recommend Mariia Belogubova for the position as a Senior HTML/Markup Developer. I have worked closely with Mariia for one year. As her project manager, I can attest that Mariia is a hard-working and trustworthy employee who take her job well. I would also like to highlight her leadership quality.

She began freelancing for us since March 2021. During her work with our company, Mariia launched 7 new high quality landings and one web store. Moreover, she created a landing builder and launched the first template landing assembled by our new component builder.

During our time together, she impressed me with her initiative that led to weekly tech meetings. Furthermore, she made several well-done presentations at these meetings.

Mariia's responsibilities as a senior html-developer included:

- developing new landings and maintaining the existed base of landings,
- maintaining WordPress stores and CRM system,
- developing a component library for quick landing generation,
- helping with onboarding process for new html-developers.

I am confident that Mariia would be a good asset for your company. Please contact me with any additional questions you might have.
